

INTERMOOR CONSTRUCTS NEW FOURCHON FACILITY, EXPANDS SERVICES

HOUSTON (Jan. 18) – InterMoor Inc., an Acteon company, has announced plans to construct a new 22-acre facility and expand services at their Port of Fourchon, La. location.

The new facility will include more than 1,200 feet of bulkhead waterfront dock space, a warehouse, office, training center and living quarters. Construction began Jan. 2, and is scheduled to be complete in November.

InterMoor Inc. designs, provides and installs integrated mooring systems worldwide for the offshore oil and gas industry. The company plans to expand its services to market equipment storage and maintenance services to clients.

“InterMoor is extremely excited to be the largest tenant in the Port of Fourchon’s Northern expansion property,” said Kirk Trosclair, InterMoor project manager. “This new facility will allow us to expand our client-based services and position our company for many years in the Deepwater Gulf of Mexico.”

The facility will be complete with three cranes to support the yard. With the addition of this equipment, Trosclair said the company will be able to market heavy-lift services.

“Our focus has and always will be to provide the best mooring and installation services to our clients within the Gulf of Mexico,” Trosclair said.

NEWS RELEASE

InterMoor is an industry leader in innovative mooring and installation technology. Acteon is a group of specialist engineering companies serving the global oil and gas industry.
