

INTERMOOR WINS GULF OF MEXICO ENGINEERING AND DESIGN CONTRACT

HOUSTON (March 22) – InterMoor Inc., an Acteon company, has finalized an agreement with Enterprise Products Partners LP to provide engineering, management and design services, Tom Fulton, InterMoor Vice President – Engineering and Projects, announced today.

InterMoor will design 12 permanent suction piles for the Independence Hub semi-submersible production facility located in the Gulf of Mexico’s Mississippi Canyon 920, approximately 150 miles southeast of New Orleans. Each pile is 18 feet in diameter and 88 feet long. Water depth at the location is approximately 8,000 feet.

InterMoor will also procure all free issue items to outfit the piles such as butterfly valves, ROV interface and cast padeyes. The piles are scheduled to be completed in the fourth quarter of this year.

As an industry leader in innovative mooring technology, InterMoor delivers integrated mooring systems for the offshore oil and gas industry in the Gulf of Mexico, Canada, Caspian Sea, Brazil, Asia Pacific and West Africa.

Acteon is a group of specialist engineering companies serving the global oil and gas industry and was formerly known as UWG Group. InterMoor evolved from Acteon’s asset acquisition of Technip Offshore Moorings, Inc.
