

## InterMoor Opens New Morgan City Facility

**HOUSTON (Jan. 13, 2011)** – [InterMoor](#), an Acteon company, is proud to announce the opening of its new 24-acre facility in Morgan City, La., announced InterMoor President Tom Fulton.

This ISO 9001:2008 approved site contains a fabrication facility that includes two fabrication buildings, both with capabilities to design and produce comprehensive offshore mooring systems, subsea foundations and equipment. This facility has more than double the capacity of InterMoor's former yard in Amelia, La.

Beyond increasing InterMoor's overall capabilities, the Morgan City site also has nearly 1,300 ft of waterfront access. The bulkheading of this slip will commence in January and take about three to four months to complete.

"InterMoor is extremely excited to open its new Morgan City facility," said Fulton. "This facility will allow us to build our client-based services and expand our fabrication capabilities to include larger projects such as suction piles, foundations and conductors."

The site also has a nearly 13,700 sq ft multi-purpose building for administrative and operations personnel. InterMoor is planning its official grand opening of the Morgan City facility in March.

[InterMoor](#) is the leading global mooring, foundations and subsea services company providing innovative solutions for rig moves, mooring services and offshore operations including engineering and design, survey and positioning, fabrication and subsea installation.

Acteon is a group of specialist engineering companies serving the global oil and gas industry.
